

General

QUESTION: What generates the effects of TC products?

The positive effect of TC products is generated by conscious creation of forms and symbols. Forms work like antennas and create or diffuse energy in their surroundings.

QUESTION: What is the symbol at the glass bottom?

The symbol is called „Flower of Life“ and in many cultures was used for stabilising and loading of positive energy. It shows the creation of life and a 6- part crystal form.

QUESTION: How does the symbol come into the glass?

The white variant is sandblasted into the glass bottom and therefore dishwasher proof. The variants gold and colored are burnt into the glass bottom at approx. 550 - 600 degrees and should be cleaned by hand.

QUESTION: Can I add additional information into the glass?

In general the vitalization in TC products is absolutely sufficient. Mixtures of energies should take place very consciously and carefully, since these can irritate themselves every now and then.

While it is possible to apply additional information to the glass, this should always be done with care and appropriate knowledge. This means that an additional mineral stone can be added into the ALADDIN water for a certain time of treatment, as the energy of the stone is additionally supported.

QUESTION: What is the reason for those waves in the design?

The 6-wave structure is selected consciously and results from the musical composition of the whole design. The relationship and the distance of the individual waves are calculated according to the rules of the “holy geometry”.

QUESTION: What does “musical design” mean?

Music is the basis of all aspects. We as humans are built in comprehensible music structures. Since life always represents movement – meaning vibrancy, we are therefore able to use these natural forces with the appropriate knowledge and experience through our designs.

QUESTION: Does each form have an effect?

Yes, each form has either a beneficial effect on its surrounding or it can sap the energy. The old masters, with their strong architectures, had always been conscious about the forces of forms.

QUESTION: How much water should be drunk?

The water quality for a healthy everyday life – meaning the drinking of vital water - is very important, as the decontamination and purification of the body play an essential role in maintenance of health.

Only clockwise rotating vibrations – such as vital water as from the TC carafe - is able to do this. Waste materials in the body are anti-clockwise rotating and can only be removed by clockwise rotating water molecules in the body.

Thus both the daily quantity and, above all, the quality of water are substantial for maintaining physical health.

Many of TC's customers relate that they have been drinking much more water, since they use ALADDIN.

QUESTION: What does "biological valency" mean?

A measuring unit for „biological valency “ is called BOVIS – the French physicists Alfred Bovis established this measuring system that is used by many dowsers and geomants to locate the vitality of humans and food. Therefore a healthy person measures approximately 7000 Bovis. Food should be above this level. The biological vitalization of water, juices or wine by the TC carafe ALADDIN amounts approx. 25,000 BOVIS units. The loading by the TC drinking cups amounts to approx. 12,500 BOVIS.

What is "biological valency"? - Statement by Dipl.Ing. Paul Sommer

www.baubetreuung.de.vu, www.elektrosmog.com

Basically all matter, also water, is concentrated energy, which we sense unconsciously as spirit. Comparable to the activation of hidden forces by mental training, the increase in biological quality of the water means the formation of a crystalline information pattern, which provides a higher development potential for the organism through their subtle energies.

QUESTION: What if I am nevertheless dissatisfied with the TC products after purchase?

We offer a general right of return to our customers for 14 days. This allows time for every customer to evaluate a detailed personal experience.

QUESTION: What if the glass gets a flaw?

Glass always has a certain residual tension due to its production. So-called shatter cracks in the glass of TC products are very rare, since these are "double relaxed". Nevertheless in rare cases glass cracks can be formed; in that case, affected products will of course immediately be replaced. Faults caused by client's negligence cannot be replaced.

Jugs & Glasses

QUESTION: Is my tap water healthy water?

Tap water is weakened by flowing in the straight pipes and by the unnatural high water pressure. While stored in the TC carafe ALADDIN and then in the TC drinking cups the water is reminded of its original vitality and gets strengthened..

QUESTION: How long does it take to vitalize water using the TC carafe?

The prime loading of normal tap water in the ALADDIN carafe takes place after just 3 minutes.

QUESTION: What is the difference between the vitalization in the carafe and glasses?

The loading in TC drinking glasses is approx. 50% of the TC carafe value.

QUESTION: What is the difference between the symbols white, colored and golden?

The golden one with approx. 23.8 carat gold portion supports the stabilization of the immune system. The colored one is very suitable for children and young people or also for people, who have a serious mind. The colorfulness of the symbol thus supports a happy mind.

The golden one shows the strongest energetic charge, followed by the colored and white one. All three variants are suitable for daily use (also for children, animals, plants).

QUESTION: What capacity do the TC forms have?

The TC carafe capacity is approx. 1.3 litres. To fill the bottom belly would be ideal, giving approx. 1 litre of content. The Delicate capacity is approx. 0.5 litres. The capacity of the glasses is approx. 0.25 litres.

QUESTION: What is the base material of the glass constituted of?

The glass is hand-blown and free of heavy metals (such as, for example, lead). As it is handcrafted work, changes in form and in weight are easily made - an indication of real originality.

QUESTION: How to clean TC table vessels, particularly in case of calcification?

You should clean your TC table vessels with citric acid. It's a bakery improver, so suitable for consumption, having an antibacterial effect and dissolving chalk marks.

Just dissolve one spoon of citric acid in hot water and dilute it then with cold water; fill the carafe and the glasses. Leave for approx. 12 hours. Rinse out afterwards.

QUESTION: Which liquids can I drink out of ALADDIN and TC glasses?

Water, juices and also wine are suitable liquids. Also tea can be drunk from it, however only use lukewarm beverages, otherwise heat cracks could form in the glass.

QUESTION: Can ALADDIN also be helpful in case of illness?

In case of illness, it is advisable to drink every liquid out of the TC carafe and to be in close proximity to the forms. Therefore place the TC carafe near your bed, since the form strength reaches approx. 2 m into its surroundings, thus supporting the immune system.

QUESTION: Where should I place ALADDIN?

Place the TC carafe in a prominent place. The effect of the form strength reaches approx. 2 m into the surrounding field (if the crown plug is on).

QUESTION: Can you hear the music from ALADDIN?

The form of TC products offers a subtle resonance space, which is comparable to the building of the violin's body. The body itself does not produce music, however it acts as an aerial and with its special dimensions, it is a vitalising instrument.

QUESTION: Can you drink wine out of ALADDIN?

The TC carafe is ideal for red wine. Decanting red wine in the TC carafe works within few minutes. Crystal investigations show a noticeably positive reinforcement of wine crystals.

QUESTION: Is it possible to drink too much vital ALADDIN water?

In rare cases natural purification processes of the body can occur at the beginning. Light headache or diarrhoea are typical indications of purification and detoxification of the body. In this case the quantity of the ALADDIN water should be reduced a little. After few days this intensive purification process of the body is terminated.

QUESTION: Should one always drink from one's own glass?

Glass is absorptive and retains personal energies. Therefore it's absolutely recommended to use your personal glass.

QUESTION: What is the price difference between the different ALADDIN variants?

Light differences in prices result from the processing of the symbols. The carafe Delicate is at 29,90 € the cheapest, followed by Happy Aladdin with 53, - €, Golden Aladdin with 56, - € and the glossy finished white variant with 59, - Euro (the glossy finishing procedure is very complex and labour-intensive).

QUESTION: What does the ALADDIN carafe do?

The carafe ALADDIN increases the biological value of its surroundings. This means the natural strength of the water is revived.

QUESTION: How long does the effect of the vitalization last?

Without interference the loading of the TC water will last about one week. Some customers fill the ALADDIN WATER into a plastic bottle and take it to work. Because plastic shows left turning energy, the charge is shortened, but will still last for the day.

QUESTION: Should you add gemstones or other things?

NO. Adding jewels especially requires a profound knowledge of the effects of stones. Stones release a special frequency spectrum, which can be used for special treatments and to aid physical weaknesses. They should not be used to constantly charge water, because not every stone is suitable for every person. In my opinion, continuous use is not wholesome for the body.

QUESTION: What is the difference to other methods of water revitalization?

Common means of water vitalization are built into existing water pipes. The contact with the flowing water is very brief and because of that the stability of the loading is very low. The continuing flow of the water through the pipes weakens the load of the water.

The charging of water in the ALADDIN CARAFE takes a few minutes and, because of that, lasts longer. The intensity of the re-vitalization with other vitalization methods is similar to ALADDIN. However the costs of ALADDIN are considerably lower. In addition to that, a TC product is a handmade, valuable product which adds to the atmosphere of the room. The vitalization of water with ALADDIN happens without the use of additional means like electricity or magnetism.

QUESTION: Which tests have been carried out?

The most important experiences come from our extremely happy customers over the last 7 years. Apart from that, there has been research into the alteration of water crystals, with expert opinions from renowned holistic experts and human medics. Essential for us, however, are the experiences and positive feedbacks of our customers.

Room fountains

QUESTION: How difficult is it to clean a TC fountain?

A well-designed, easy system with detailed description is included when you buy your TC fountain. The cleaning set includes citric acid and a tube to empty the fountain. The TC fountain is maintained and cleaned in minutes and guarantees many years of constant re-vitalization, leaving you delighted with your beautiful original piece.

QUESTION: Are TC fountains machine-produced?

No, every TC fountain is hand made in Austria. If you wish, you can watch your own fountain being made and at the same time experience the fascination of glass making.

QUESTION: What happens if a glass breaks?

In the TC workshop constant quality checks are routine and offered to customers. This guarantees a life long function of the TC fountain.

QUESTION: Why is the effect of the TC fountain so intensive?

The form of the TC fountain results in a large water "coat" which takes in the air, cleans it and releases it back in to the room. Dust and bacteria are bonded to the water. This cleans the atmosphere and keeps lungs and bronchi free from unnecessary strains.

The number of waves, their distance and their relation to each other results in exact calculation and therefore causes the release of vital water-qi.

QUESTION: How far into the room does the TC fountain work?

The larger TC fountains works about 25m into the room, the light one about 12-15m. Plants and animals also react extremely positively to TC products.

QUESTION: Does the colour of the TC fountain influence the effects?

Important is the form of the TC fountain. With the colour you can transport additional positive frequencies into the room. Every colour has a beneficial effect on certain cell activity by its frequency.
